📍 Saint Petersburg, Russia

🌐 maxfancheak

EXPERIENCE

Work

Huawei

📅 Jan 2022 - Sep 2022

📍 Saint Petersburg

Researching a data about the work of HarmonyOS, hypothesizing, optimizing the operation of the OS as a whole and various metrics of its operation separately (IPS, Power consumption, etc.). He also worked on data compression algorithms.

Stack for working with data:

Sklearn/PyTorch/Pandas/Matplotlib/SQLite/Android Tools

Stack for system development:

C/C++/Rust/Go/Linux

Internship

JetBrains

📅 Oct 2020 - Jan 2021

📍 Saint Petersburg

Optimized the *DSU-based algorithms in Java/Kotlin systems.
*DSU - Disjoint set union

PROJECTS

Computer Vision

<https://github.com/MaxFanCheak/model-images>

📍 Python

- Simple CV model

Lovely comment filter

<https://github.com/MaxFanCheak/model-text>

📍 Python

- Model checks the comments and selects the positive and lovely ones from them.

Parser generator

<https://github.com/MaxFanCheak/grammar-parser-generator>

📍 Java

Generates a parser from this language in java based on the grammar of the language.

Yandex SHAD

<https://github.com/MaxFanCheak/shad-rust>

📍 Rust

Yandex SHAD Rust course.
